## RFID Guard Tour System

### RFID Guard Tour

Data Collection Unit

#### 3 YEAR Warranty

Super durable water-proof reader  
2 Year battery life (user replaceable)  
Drop detection and reporting

The **most advanced guard tour reader** in our product line. Superior durability achieved with improved casing design and no-button operations.

- An amazing 3 year warranty!
- 2 year battery life (USER REPLACEABLE BATTERY)
- Completely Waterproof
- 30,000+ Memory
- Wireless Downloads to computer
- 5" by 1" small compact size
- Only weighs 4.7 ounces

A **Guard Tour System** enables verification and accountability of a guard's movement by providing the location, time and date stamp.

The main advantages of using **RFID (proximity)** over other technologies are:

**Non Contact:** bar code, touch memory (Dallas iButton) and other optically read systems would be useless through a variety of substances such as snow, fog, ice, paint, dust, wood, concrete and other visually and environmentally conditions.

The significant advantage of an RFID system, is the non contact and the non line of sight nature. Cards can be read under water and through all the above substances.

**Convenient:** can be installed in multiple ways. Checkpoints can be hidden in walls preventing tampering and no need to use expensive brackets

# Hillman Time Systems

## RFID Guard Tour System

**Intrinsically Safe:** can be installed in potentially explosive atmospheres

### **\$995.00 System Includes:**

- 1 Super Durable RFID Guard Reader
- 1 Leather Holster
